THIN SOLID FILMS VOLUME 235, NUMBERS 1–2, NOVEMBER 25, 1993

Contents

Letters

Some characteristics of heavily Be-doped GaAs layers grown by molecular beam epitaxy 1
D. H. Zhang, K. Radhakrishnan, S. F. Yoon, H. M. Li, A. W. Lek and E. H. Lau (Singapore, Singapore)

Growth direction dependence on strain relief by misfit dislocations in strained-layer heterostructures 6
J. Zou (Sydney, NSW, Australia)

Highly rectifying organic two-layer diodes using the interface between 5-methyl-10-(4-methylbenzyl)- and 5-methly-10-(4-methoxybenzyl)-5,10-dihydrophenazines and lightly doped poly(3-methylthiophene) 10
K. Uehara, K. Okitsu, M. Tsunooka, A. Sugimoto and H. Inoue (Osaka, Japan)

Electron drift mobility in DLC thin films 13
W. Mycielski, E. Staryga and A. Lipiński (Łodz, Poland)

Low-temperature atmospheric-pressure chemical vapor deposition of tungsten oxide thin films 15
U. Riaz (Dearborn, MI, USA)

Preparation of CdS semiconductor thin films by a solution growth technique 17
S. C. Sahu and S. N. Sahu (Bhubaneswar, India)

Growth of ZnO films by low-pressure organometallic chemical vapor deposition 20
K. Kobayashi, T. Matsubara, S. Matsushima and G. Okada (Matsuyama, Japan)

Electrical switching in Au–PbPc–Au thin film sandwich devices 22
R. A. Collins and A. K. Abass (Lancaster, UK)

Synthesis and Characterization

Films of molybdenum trioxide obtained from $MoTe_2$ oriented films 25
J. C. Bernède, Z. K. Alaoui and N. Manai (Nantes, France)

Boron nitride thin films by microwave ECR plasma chemical vapor deposition 30
M. J. Paisley (Raleigh, NC, USA), L. P. Bourget (Woburn, MA, USA) and R. F. Davis (Raleigh, NC, USA)

Structural and analytical characterization of an iridium oxide thin layer 35
N. Bestaoui, E. Prouzet, P. Deniard and R. Brec (Nantes, France)

Evidence of the formation of a charge-transfer complex between iodine and plasma-polymerized acrylonitrile 43
A. H. Bhuiyan (Dhaka, Bangladesh) and S. V. Bhoraskar (Pune, India)

Solution growth technique for deposition of nickel oxide thin films 47
A. J. Varkey and A. F. Fort (Kwaluseni, Swaziland)

Cadmium chalcogenide semiconducting thin films prepared by electrodeposition from boiling aqueous electrolytes 51
Z. Loïzos, A. Mitsis, N. Spyrellis (Athens, Greece), M. Froment and G. Maurin (Paris, France)

Investigations of the microstructure of plasma polymer tin and copper composite films using electron microscopy methods 57
C. Reinhardt, A. Heilmann, W. Grünewald and C. Hamann (Chemnitz, Germany)

Crystal growth and microstructure of polycrystalline $Ti_{1-x}Al_xN$ alloy films deposited by ultra-high-vacuum dual-target magnetron sputtering 62
U. Wahlström, L. Hultman, J.-E. Sundgren (Linköping, Sweden), F. Adibi, I. Petrov and J. E. Greene (Urbana, IL, USA)

Investigation of composition uniformity of $MoSi_x$ sputtering films based on measurement of angular distribution of sputtered atoms 71
T. Yamazaki and N. Ikeda (Toyama, Japan), H. Tawara (Nagoya, Japan) and M. Sato (Osaka, Japan)

Persistent photoconductivity and band offset in μc-Si:H/a-Si:H superlattices 76
J. Liu and L. Feng (Chengdu, People's Republic of China)

Stability of a new polyimide siloxane film as interlayer dielectrics of ULSI multilevel interconnections 80
T. Homma, Y. Kutsuzawa, K. Kunimune and Y. Murao (Kanagawa, Japan)

Elsevier Sequoia

Effects of substrate orientation and cooling rate on microstructure of $PbTiO_3$ thin films grown by metal-organic chemical vapour deposition 86
Y. Gao (Socorro, NM, USA), G. Bai, K. L. Merkle, H. L. M. Chang and D. J. Lam (Argonne, IL, USA)

Surfaces, Interfaces and Colloidal Behaviour

Electrolytic composite layers based on nickel with nickel oxide addition 96
M. Oleksy, A. Budniok and P. Matyja (Katowice, Poland)

Photocontrol of in-plane alignment of a nematic liquid crystal by a photochromic spiropyran molecular layer 101
K. Ichimura, Y. Hayashi (Yokohama, Japan), K. Goto (Sapporo, Japan) and N. Ishizuki (Tokyo, Japan)

Chemically-accelerated corrosion tests for aluminum metallized ICs 108
D. R. Sparks (Kokomo, IN, USA)

The electrical and surface properties of thin films of Li glass solid electrolyte 112
D. Zhao and X. Pan (Shanghai, People's Republic of China)

Magnetic alignment of aliphatic lamellae 116
V. Brzezinski and I. R. Peterson (Mainz, Germany)

Metallurgical, Protective and Hard Layers

Strength and toughness measurement of thin brittle coatings on substrates. Part I. Theory and measurement 120
J. H. Selverian and D. O'Neil (Salem, MA, USA)

Strength and toughness measurement of thin brittle coatings on substrates. Part II. Experimental determination 129
J. H. Selverian and D. O'Neil (Salem, MA, USA)

X-ray residual stress analysis of a ceramic thermal barrier coating undergoing thermal cycling 137
D. W. Jordan and K. T. Faber (Evanston, IL, USA)

Structural characterization of laser-processed WC/Co layers 142
M. Boas and M. Bamberger (Haifa, Israel)

Mechanics and Nanomechanics of Thin Layers

Mechanical characteristics of aluminum thin films on silicon and gallium arsenide 149
J.-H. Jou and C.-S. Chung (Hsin Chu, Taiwan)

Finite element comparative study of elastic stresses in single, double layer and multilayered coated systems 156
H. Djabella and R. D. Arnell (Manchester, UK)

Electronics, Optics and Opto-electronics

Effect of electron-beam deposition rate on the electrical properties of Ti/ and Pt/n-GaAs contacts 163
F. D. Auret, W. O. Barnard, W. E. Meyer and G. Myburg (Pretoria, South Africa)

Diffusion barrier study on $TaSi_x$ and $TaSi_xN_y$ 169
W.-C. Wang, T.-S. Chang, F.-S. Huang and J.-R. Chen (Hsin-Chu, Taiwan)

Third-order non-linear optical susceptibility measurements of thin films of 3-methylthiophene and methylmethacrylate copolymers 175
H. S. Nalwa (Ibaraki, Japan)

Effect of temperature on stress-induced open failure in aluminum interconnects of LSIs 182
K. Hiraoka (Kanagawa, Japan)

Optimization of ion implantation damage annealing by means of high-resolution X-ray diffraction 189
J. G. E. Klappe, I. Bársony (Enschede, Netherlands), J. R. Liefting (Amsterdam, Netherlands) and T. W. Ryan (Almelo, Netherlands)

Electrodeposition and properties of copper-doped cadmium sulphide 198
T. Edamura and J. Muto (Yokohama, Japan)

Superconductivity

Laser deposition of epitaxial $YBa_2Cu_3O_7$ films with low droplet densities 202
M. Schilling, F. Goerke and U. Merkt (Hamburg, Germany)

Langmuir–Blodgett, Biological and Related Films

Highly ordered LB films of DHAP: a donor acceptor substituted polyene 210
M. Schmelzer, S. Roth, C.-P. Niesert, F. Effenberger and R. Li (Stuttgart, Germany)

Thin Film Devices, Sensors and Actuators

Microstructural and electrical characterisation of ion-beam-sputtered polysilicon films for microelectronic applications . 215
S. Das, S. K. Lahiri and A. K. Chaudhuri (Kharagpur, India)

D.c. electrical measurements and temperature dependence of the Schottky barrier capacitance on thin films of β-MgPc dispersed in polycarbonate 222
A. S. Riad, M. El-Shabasy and R. M. Abdel-Latif (El-Minia, Egypt)

Condensed Matter Film Behaviour

Compaction of tungsten oxide films by ion-beam irradiation 228
W. Wagner, F. Rauch (Frankfurt am Main, Germany), R. Feile, C. Ottermann and K. Bange (Mainz, Germany)

Optical absorption in porous silicon of high porosity 234
V. Grivickas and P. Basmaji (Sao Carlos, Brazil)
